

Prolog lab questions

SN	Problem	Date	Signature
1	Write a program to find the family relation and sum of two numbers.		
2	a) Write a program to find the area and perimeter of a rectangle. b) Write a program to find the sum, difference, multiplication, division, and integer division		
3	a) Write a program to find factorial. b) Write a program to find fibonacci.		
4	a) Write a program to find the GCD and LCM of a given number. b) Write a program to find the relation. c) Write a program to find the solution to a tower of Hanoi problem		
5	a) Write a program to find an area of a triangle. b) Write a program to find the cube of a given number.		
6	a) Write a program to concatenate. b) Write a program to delete. c) Write a program to count the length of a list. d) Write a program to check whether the given member is in the list or not.		
7	a) Write a program to find the greatest number among given numbers. b) Write a program to check if the number is a palindrome.		
8	a) Write a program to find the average of a given number. b) Write a program to find the factor of given number.		
9	a) Write a program to find the relation. (Who is mortal?) b) Write a program to find the relation. (Which locations are in Asia ?)		
10	a) Write a program to find the maximum number of given numbers. b) Write a program to find the greatest number among given number.		

11	a) What are the values of S, M, E, N, D, O, R, and Y that satisfy the equation SEND + MORE = MONEY? b) Write a program to print a square of stars with a side length X.		
12	a) Write a program to find the path from the start node to the goal node using breadth-first search b) Write a program to find the path from the start node to the goal node using depth-first search
