

SN	LABS	Date	Signature
1	Write a program to find prefixes, suffixes and substring from given string.	2081/05/26	
2	Write program to implement following DFA's over alphabet. I). The DFA that accepts all the strings that start with 01. ii) The DFA that accepts all the strings that end with 01. iii)The DFA that accepts all the string that contains substring 001.	2081/05/26	
3	Write a program to validate C identifiers and keywords.	2081/05/26	
4	Write a program to implement PDA that accepts all strings over alphabet that have equal number of 0s and 1s I) by final state ii) PDA accepting equal number of 0s and 1s with empty stack	2081/05/26	
5	Write a program to implement PDA that accepts all strings over alphabet that have contain number of 0's followed by equal number of 1s by final state.	2081/05/27	
6	Implement the TM accepting the language $\{ 0^n 1^n / n \geq 1 \}$ over alphabet,	2081/05/27	
7	Implement the TM: $L = \{ a^n b^n \mid n \geq 0 \}$	2081/05/28
